

Database Technologies Assignment - 01
Rollno: 210950320034, Name: Deepankar jadhav

Q3) Select all information from dept table.

SELECT * FROM Department;

The screenshot displays the MySQL Workbench interface. The main editor window contains a SQL script with the following content:

```
1 • CREATE table Department(  
2   Department_No INT(2),  
3   Department_Name varchar(13),  
4   Location varchar(14),  
5   primary key (Department_No));  
6  
7 • INSERT into Department(Department_No, Department_Name, Location) values(10, "A", "New York")
```

Below the script, the 'Result Grid' tab is active, showing the output of the query. The grid contains the following data:

| Department_No | Department_Name | Location |
|---------------|-----------------|----------|
| 10 | Accounting | New York |
| 20 | Research | Dallas |
| 30 | Sales | Chicago |
| 40 | Operations | Boston |

The left sidebar shows the 'Navigation' pane with sections for MANAGEMENT, INSTANCE, and PERFORMANCE. The bottom status bar indicates the SQL script was saved to 'D:\DBMS\Assignment01\Q3.sql'.
